Whiteford Township

John Dingell
2328 Rayburn House Office Building
Washington DC. 20515

Dear Mr. Dingell

I have a grave concern about the new flood plain maps that are being forced upon us by FEMA. Our County has lost over 2% more of its land mass to the new fold plain. FEMA says the data didn't change just the way they look at it. Monroe County Paid for a fly over by the Army Corps of Engineers to do a complete elevation study of the county. The company doing the work for FEMA says that the information isn't timely enough and they must move forward with the data they have. The new data is much more accurate and a test of the data shows that the old flood plain maps are close to being right. I feel that the only way we are going to correct this problem is legislatively. If you apply this same formula to the entire state it will push thousands of people out of their homes because of the cost of flood insurance. Please work to find a way to stop the implementation of the new flood plain maps.

Sincerely

Your name.
